SBP and FAS Panamá entered into a Cooperation Agreement in favor of Recycling

With the aim of contributing to the preservation of the environment and strengthening the in-house recycling project “Reciclando por la gente y el ambiente” (Recycling for the People and the Environment), a Cooperation and Assistance Agreement was entered between the Superintendency of Banks of Panama (SBP) and Fundación de Acción Social por Panamá (FAS Panamá).

The aforementioned agreement intends the donation, by the SBP, of solid waste for recycling and reuse, including aluminum cans, plastic bottles, tetra-pack containers and white paper.

In accordance with the provisions of the agreement, the SBP has organized a team of employees who will be responsible for the activities related to the recycling program, sorting common solid waste, which will be transferred to the Recyclable Collection Center (CAR), operated by FAS Panamá in the City of Knowledge.

For its part, FAS Panamá will provide advice, technical assistance and training on waste management to SBP employees.
